#### Saliva Direct COVID test

Saliva based COVID 19 test  
*Positive for COVID-19*

Positive for COVID-19

**Positive SARS-CoV-2**

>> *You have tested positive for COVID-19.*

> *If you are a student, faculty or staff member at Boise State University:*

-- *Immediately isolate yourself from others.*

-- *Contact publichealth@boisestate.edu to let them know you have tested positive. Contact tracing team members from the Boise State Public Health office will work with you to help you understand the steps you must take during isolation and to connect you to Boise State campus COVID resources available to you during your isolation period.*

-- *If you are a campus resident, contact tracers will start the process of moving you to separate isolation housing and connect you with our Boise State COVID nursing team.*

-- *Boise State contact tracers will also design a return to campus plan with you as well as work with you to recall everyone with whom you have had close contact during the time frame that you may have been infectious. Public health staff then will then reach out to these exposed individuals (contacts) to warn them of their potential exposure as rapidly and sensitively as possible.*

> *If you are a Boise School District student or Boise School District employee, please contact your school and ask for the school nurse.*

> *If you are not one of the above: Isolate from others immediately, contact your care provider for assistance, and follow CDC isolation guidance.*

> *All individuals receiving a positive test result should:*

-- *Monitor your symptoms.*

-- *Stay in a separate room from other household members, if possible*

-- *Use a separate bathroom, if possible*

-- *Avoid contact with other members of the household and pets*

-- *Do not share personal household items, like cups, towels, and utensils*

-- *Wear a mask when around other people*

*This test was a molecular test performed using reverse transcription polymerase chain reaction (rRT-PCR). Our laboratory is a designated testing laboratory by the Yale School of Public Health and certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. §263a and meet the requirements to perform high complexity tests.*
